PROFESSIONAL SUMMARY

Software Engineer with experience building and improving systems with a focus on efficiency and reliability. I've worked on automating workflows, handling large datasets, and improving performance across applications. I'm comfortable working across engineering, QA, and data-related tasks, and tend to focus on finding practical solutions that make systems easier to maintain

WORK EXPERIENCE

topcasinorewards.com

Sep. 2024 – Present

Software Engineer II

Remote (Canada)

- Automated synchronization of externally hosted JSON data by implementing a scheduled process that detects changes and updates the database, eliminating manual tracking
- Conducted code reviews and provided mentorship to junior engineers.
- Led a development team, delegating tasks, ensuring clear communication, and fostering collaboration to achieve project goals and deadlines.
- Improved system reliability by identifying inefficiencies and implementing scalable solutions across workflows.
- Leveraged AWS (S3) to restructure asset delivery, significantly reducing build size and improving system performance.
 - **Stack:** Typescript (React + Next); Prisma; PostgreSQL; Docker; Redis;

joindawraty.com

Aug. 2023 – Aug. 2025

Software Engineer I

Remote (Kuwait)

- Automated internal workflows that reduced manual processing time from hours/days to minutes, improving operational efficiency and reducing human error.
- Adapted web applications for mobile platforms (iOS & Android), ensuring consistent functionality and performance across environments.
- Led end-to-end product development lifecycle, from concept to development, staging, and production.
- Collaborated with international teams to design product features for different languages and countries.
 - **Stack:** JavaScript (React + React-Native); PHP (Laravel); MySQL

Percent Apparel

Feb. 2022 - Jun. 2023

Full-Stack Developer

San Jose, CA

- Streamlined data synchronization between Shopify APIs and internal systems, reducing manual data handling.
- Integrated Shopify API services for a full custom front-end rework.
- Worked with product, inventory, and customer datasets to build dynamic, data-driven UI experiences.
 - **Stack:** Typescript (React + Next); Shopify

EDUCATION

Bloom Institute of Technology

Apr. 2021 - Apr. 2022

Major: Computer Science

Online

SKILLS & TECHNOLOGIES

- **Skills:** Internationalization (i18n); Version Control Systems; Data Management & Query Optimization; Process Automation & Workflow Optimization; Frontend Frameworks; Project Management; API Integration; Mobile App Development; AI Development
- **Technologies:** ReactJS; NextJS; Javascript/Typescript; Python; Prisma; Express; PHP; Laravel; C#; .NET Core; Git; Xcode; MySQL; PostgreSQL; AWS; Azure; Jest; Cypress; Docker; xUnit; Salesforce;
